

MOHAMED IBRAHIM Y

Backend Developer | Python | Flask | PostgreSQL

Chennai, Tamil Nadu | +91 9361680651 | connect.ibrahimy@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience designing, building, and deploying production REST APIs and web applications using Python, Flask, PostgreSQL, and SQLAlchemy. Experienced in JWT authentication, caching, rate limiting, background job scheduling, relational database design, testing, and CI/CD pipelines. Delivered multiple end-to-end web applications for real clients, implementing secure, database-driven solutions from development through deployment.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Backend:** Flask, SQLAlchemy, REST APIs, JWT Authentication, Flask-Caching, Flask-Limiter, APScheduler
- **Databases:** PostgreSQL, SQLite
- **Frontend:** HTML, CSS, JavaScript
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), Postman, Render, Railway, Cloudinary
- **Testing:** Pytest, Unit Testing, API Testing
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Computer Networks

PROJECTS

Job Tracker API — Backend System | [Live Demo](#) | [GitHub](#)

Python • Flask • PostgreSQL • SQLAlchemy • JWT • APScheduler

- Designed, built, and deployed a production-ready 12-endpoint REST API using Flask and PostgreSQL with JWT access/refresh authentication and strict per-user data isolation.
- Built a job application lifecycle tracker supporting Applied → Interview → Offer/Rejected workflows with complete status-history logging using a normalized relational database schema.
- Implemented response caching, rate limiting, and schema-based input validation to improve API performance, reliability, and security.
- Developed automated background jobs with APScheduler and integrated Pytest with GitHub Actions CI/CD for continuous testing and application maintenance.

Money Tracker — Personal Finance Web Application | [Live Demo](#) | [GitHub](#)

Python • Flask • SQLite • HTML • CSS

- Developed a full-stack expense and income tracking application with session-based authentication and protected routes.
- Designed a normalized relational database schema for users, categories, and transactions, implementing secure CRUD operations with strict multi-user data isolation.
- Built an interactive dashboard providing instant summaries of income, expenses, and net balance with server-side validation and error handling.
- Implemented transaction categorization and financial summaries through optimized database queries.

FREELANCE PROJECTS

Curated by Afza — E-Commerce Platform | [Live Site](#) | [GitHub](#)

Python • Flask • PostgreSQL • SQLAlchemy • JavaScript • CSS

- Built and deployed a production Flask e-commerce platform featuring product catalog management, order management, and an administrative dashboard for a handmade gifts business.
- Integrated Cloudinary for image management, refactored the frontend into modular CSS and JavaScript architecture, and conducted a comprehensive security audit with a structured remediation roadmap.

Awaken Your Inner Power — Appointment Booking Platform | [Live Site](#) | [GitHub](#)

Python • Flask • PostgreSQL • SQLAlchemy • JavaScript

- Designed, developed, and deployed a Flask-based website for a life coaching business featuring a database-driven appointment booking system powered by FullCalendar.js.
- Developed a secure administrative dashboard for managing appointments, blocked time slots, and booking schedules through a database-driven interface.

EDUCATION

B.E. Computer Science and Engineering

Dhaanish Ahmed College of Engineering, Chennai, Tamil Nadu

CGPA: 8.01 / 10

2022 – 2026
